Message from the Guest Editors

Dear Colleagues,

The number of animals used in research has significantly increased with the advancement of sciences and the development of medical technology. This has led to an increasing demand and implementation of alternatives approaches that can partially or entirely replace laboratory animals, also in line with the guiding principles of the 3Rs (Replacement, Reduction, and Refinement).

Mainly, there are two alternatives to in vivo animal testing: the use of cell culture to develop 2D assays or more complex 3D structures and the application of in silico computer simulations.

The development of new drugs or delivery systems involves a plethora of tests on animals, including assays to evaluate the ability of molecules to permeate membranes and tissues of our body.

This Special Issue will focus on in vitro and in silico alternative methods to the use of animals for drug permeation studies across the ocular and cutaneous barriers.

Prof. Dr. Susi Burgalassi

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), and many other databases.

Journal Rank: [JCR - Q1 \(Pharmacology & Pharmacy\)](#) / [CiteScore - Q2 \(Pharmaceutical Science\)](#)
